RESIDENTIAL SERVICES

Waste Pro now provides an easier method for collecting your household trash. Waste collection services are provided to individual residents on a scheduled basis. Residents will continue to use their existing recycling bin for recyclable material. The 96-gallon green and blue garbage carts are durable and easy to manuever to the curb. Remember to face the carts lid-opening to the street and wheels facing your home. Waste Pro will begin the use of automated trucks in the Spring of 2013.

NEW CART SERVICE FOR RESIDENTIAL CUSTOMERS

Since Oct. 1, 2012 residents were provided a 96-gallon container for use under the new contract with Waste Pro. The decision to provide this type of container to residents was made for several reasons. The 96-gallon container is extremely durable and needs little maintenance. The large wheels make them highly maneuverable and convenient to roll to the curb for collection. Containers will have an attached lid preventing animal scavenging and offensive odors. Neighborhoods will have a uniform appearance that improves the aesthetics throughout the City. We're confident the collection experience will be enhanced with the addition of this new cart.

Effective Date of October 1, 2012

Waste Pro improves the City of Deltona residential collection program.
